

QUALITY, ENVIRONMENT AND HEALTH AND SAFETY AT WORK POLICY

DEPURFILTECH, S.L.U, whose activity is focused on the supply of eco-efficient products for the protection of the environment by optimising the purification of industrial pollution (dry/wet process) and the management of related integral maintenance services, is an organisation with a technical and professional team that offers its customers the guaranteed result of its filtration experiences.

We approach our integrated quality, environmental and occupational health and safety management system as a way of organising its business life, basing it on basic pillars such as the quality of service and processes to achieve the full satisfaction of our customers, the protection of the environment and the prevention of damage and deterioration of health to eliminate or minimise risks to staff and other interested stakeholders.

Therefore, it declares its integrated management system in accordance with the requirements of the international standards UNE-EN-ISO 9001, UNE-EN-ISO 14001 and ISO 45001 in force, as a strategic and priority objective, basing its foundations and commitments on the following principles:

Comply with the applicable legal and regulatory requirements, as well as with other requirements subscribed to by the organisation related to the activity carried out by the company the environment and health and safety at work

Protect the environment by assuming the commitment to prevent pollution through the rational consumption of resources, avoiding waste, the correct waste management, promoting the application of the 3R philosophy, and carrying out a continuous effort to minimise the environmental impact of our activity through the control of the significant environmental aspects.

Provide safe and healthy working conditions for the prevention of injury and deterioration of health, not only for our own employees, but for all work-related stakeholders, appropriate to the context of our organisation, as well as to the nature of the identified occupational health and safety risks and opportunities.

Provide and maintain for all employees a safe and suitable working environment in terms of facilities and arrangements for their well-being at work, eliminating hazards and reducing risks to health and safety at work.

Make all workers aware that they are obliged to look after their own health and safety as well as that of others, and that the example of their personal behaviour is essential.

Consult employees and promote their participation in matters of safety, environment and health and safety at work.

Ensure total customer satisfaction, giving them the quality, they expect and to which we have committed ourselves by meeting the needs and requirements defined by them.

Make constant progress towards the continuous improvement of quality, safe working conditions and our environmental performance, doing things right the first time, which will allow us to reduce costs and obtain a better use of the productive means.

Reinforce our competitive position since working with quality, ensuring safe working conditions and projecting an image of environmental respect in a systematic way, gives prestige and is a solid differentiating argument from our competitors.

Effectively control all processes, analysing the operation and possible deviations from planning, putting into practice the necessary corrective measures and opportunities for improvement that arise, aiming to offer an effective and efficient service at all time.

Promote an understanding and diffusion of this policy with transparency criteria within the organisation, including our suppliers and clients in the commitment.

Provide the necessary human and technical resources to ensure all of the previous points.

This commitment requires cooperation and participation attitudes from all levels and for this information, communication and increase of personal competence are indispensable.

At Depurfiltech we carry out our activity always bearing in mind that our work must: ENSURE CUSTOMER SATISFACTION, PROTECT THE ENVIRONMENT AND TAKE CARE OF HEALTH AND SAFETY AT WORK.

In Alonsotegui, 3rd October 2019

José Manuel Saiz, GENERAL DIRECTOR

Quality, Environment and Occupational Health and Safety Policy
