

DepurFiltech, collaborates in these times of need, and limited resources in terms of workers and the material itself, with the sending of masks to different sectors of the population, such as;

Health (doctors and nurses), cleaning staff, state security forces and corps, firemen, local police, supermarket staff, residences and some specific clients of our activity, such as;

Pharmaceutical laboratories and industrial companies in general with dusty environments, etc.

They are simple masks made of polypropylene material (woven/non-woven), for primary prevention, not advisable for use in ICUs or people who have Covid-19, for this type of people it would be necessary to use the so-called FP-2 or FP-3.
